

FWPFGM3213 Fall trees manually [advanced]

The objective of this course is to build on existing methods and techniques and includes all trees including those that are hazardous, but not dangerous.

Existing falling techniques are further progressed and adapted to fall trees of any species, size and condition including hollow butts, multi-leggers, heavy leaners, double or multiple leaders, stags/culls and very large trees.

Note that participants should already be competent and experienced tree fallers at the intermediate level. Duration 5 days.
